

Ormond Beach

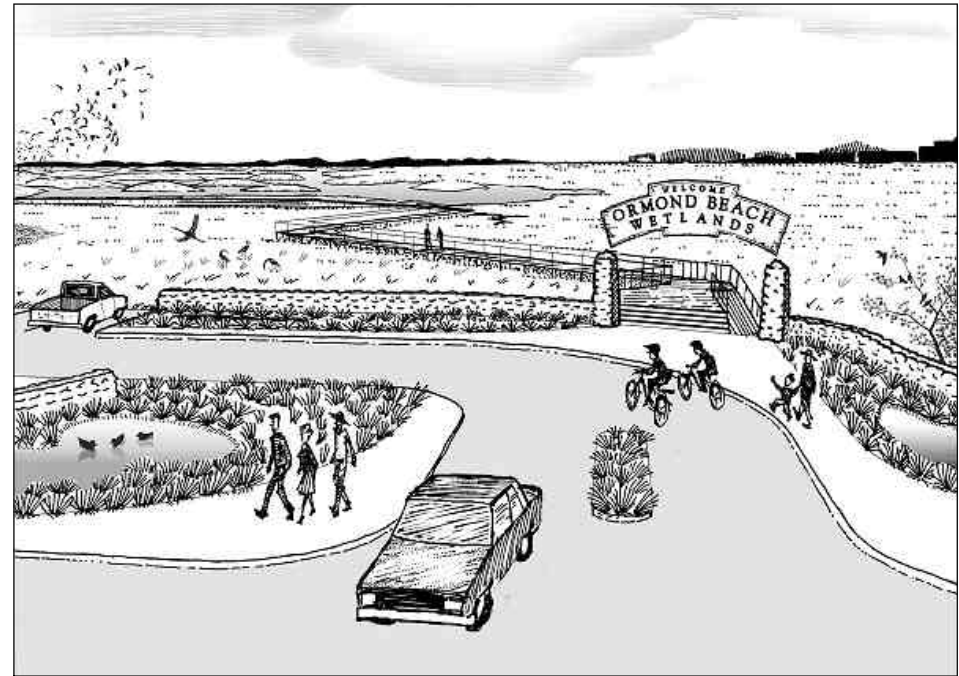

PLANNING & DEVELOPMENT OBJECTIVES

SAVIERS ROAD DESIGN TEAM
OXNARD, CALIFORNIA

We advocate an aesthetic, environmentally-sensitive approach to the treatment of Ormond Beach, placing Oxnard on the map as a progressive city, a desirable tourist location, and a city in which its residents take pride.

OUR GOAL: Public ownership of the Ormond Beach Enhanced Wetlands Preserve including the upland areas

Concept for entry to Ormond Beach Wetlands

Least Tern Least Tern Chick Lagoonal Remnant

In order to conserve, enhance and provide access to Ormond Beach, the following must be implemented:

Establish a specific/master plan for the Ormond Beach area that conforms with California Coastal Act policies.

Ensure that the Ormond Beach Specific Plan is in place prior to any negotiation for sale or development.

Require that all development plans be evaluated for their impact on the wetlands and on the people in neighboring communities.

Give priority to the California Coastal Conservancy for the purchase of all Ormond Beach property and work with the Conservancy on the wetland restoration. Identify additional sources of funding to establish the Wetlands Preserve.

Halaco Slagpile

Shut down Halaco. Remove and clean up the slagheap. Restore and buffer the degraded Ormond Beach Wetlands ecosystem.

An example of what could be done here

Incorporate young people into planning, restoring and maintaining the Wetlands Preserve. Utilize the wetlands as a living laboratory for educational and research purposes.

A channel at Ormond Beach

Provide a convenient public access as required by law.

Create a public gateway park on the 38-acre upland parcel located south of Hueneme Road at Saviers Road.

Include the Saviers Road Design Team proposal in any Environmental Impact Report (EIR) prepared for the Ormond Beach area.
